# Know About US!

**Technonix** growth through creativity and innovation will be driven by diversity. Our commitment to ongoing globalization is reflected in a determination to enrich management with people offering diverse perspectives.

Our firm is built on value and trust. How we work with our clients is as important as what we do for them. We take client service seriously. Our client's priorities drive our business focus to ensure their needs are met. We advocate on their behalf. Our solutions enable companies to substantially reduce costs to improve margins and conserve time. We help businesses become more scalable, ramp more efficiently, and get to market faster.

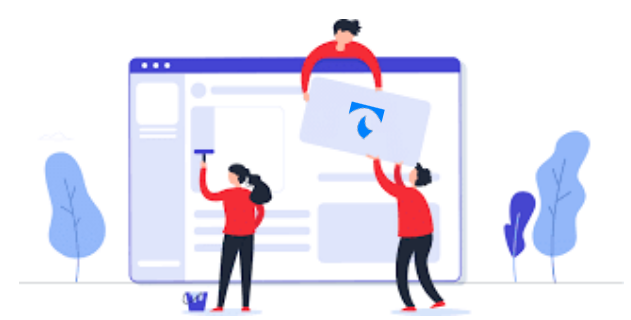

We make it possible for our clients to focus their efforts and investments on other priority deliverables. Our flexible approach, dedication to quality, and experienced team make outsourcing easy and predictable.

When you look deep, you'll find an operations management with a different kind of approach.

When you look deeper, you'll find **Technonix(Tx)**.<sup>®</sup>

# Why Tx<sup>®</sup>?

**Technonix** is in charge of ensuring that the application is built according to the plan. We follow Six Sigma methodology to manage process variations that cause defects and to systematically work towards managing variation to eliminate those defects.

---

Setting up standard quality measures on clients business objectives with shared responsibility

---

Develop a robust model and mobilize quality analytics/intelligence for the networks within these organizations.

---

Create clear standards and measurements, E.g. "Dashboard measurements". Which provide quality status information clearly and quickly.

---

Make use of existing process measures and checkpoints wherever possible rather than introduce new measures.

---

Do not limit interventions to identifying failures to meet standards; require corrective action plans based on root cause analysis.

---

Focus on correcting the process that contributed to failure rather than installing short-term fixes to problems.

# WE ARE OFFERING FUTURISTIC SERVICES

We have successfully delivered lot of projects covering a wide range of industries from simple websites to complete e-commerce platforms and powerful bespoke, business critical web applications. Our procedures are designed to provide a structured process which is simple, supportive, informative.

# Technonix – a cloud player

Enriching the technology by Empowering the solution.

Technonix offers Cloud Computing in a process of delivering/enabling scalable, expandable and almost perfectly elastic software services using internet technologies. It is a method of delivering Software as a Service (SaaS) & Platform as a Service (PaaS) delivered in a pay per use basis. It provides self service capabilities to users with scalable features to increase usage on requirement.

*"When ever you find yourself on the side of the majority, it is time to pause and reflect. "*

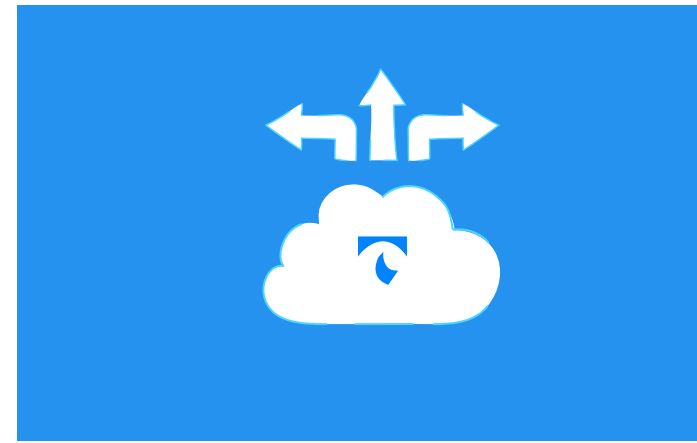

- Mark Twain

By adopting standardized processes, common tools and shared work environments, agencies can accelerate application delivery, improve productivity and enhance quality—making application development repeatable and scalable. Increasingly, emerging techniques, such as cloud-based environments and automated testing, are being used to reduce development costs dramatically.

# Tx<sup>®</sup> Cloud Services

## CLOUD NATIVE APPLICATION

- Cloud Native Application, Architecture, Design & Build(12 factor app).
- Application Runtime platform Design, Integration & Build.

# Tx<sup>®</sup> DIGITAL MARKETING

A creative pathway to Approach!

Digital marketing is overtaking traditional marketing as social media platforms and targeted ads make it possible to interact with specific audiences in real time. In today's digital marketplace, customers not only expect a digital presence but also are more likely to trust a company with a digital footprint.

Creating a strong online presence demands more than a well-optimized website. As more customers and potential customers spend their time on platforms like Facebook and Instagram, search engines are assigning more weight to content shared on these sites.

**SMM**

Creating a buzz generated through millions of user is incomparable to any other kind of advertising. Social Media Optimization thus has a far-reaching and absolute impact. With more and more people indulging on social network such as Facebook, Instagram and LinkedIn, Tx can increase your brand exposure and leads

**SMO**

Search engine marketing are providing ideas to implement in our marketing mix for brands, Tx helps to manage the campaigns that will maximize the results of your search engine by ongoing services.

**SEM**

**DIGITAL MARKETING**

# SEO

Tx offers you to increase traffic to your website with our SEO experts to grow your Business next level. Search Engine Optimization (SEO) is not a secret tactic now as most of the businesses have sensed its significance. Different businesses may have different requirements. But they all require exposure in the virtual world.

Tx understands that Search Engine Optimization is an art and we are up to it all the time, keeping pace with the changing algorithms of search engines. We offer the right thrust and energy boosters that are required for your website through its intrinsic digital marketing services.

We present SEO services and develop basic marketing plans, web design services, and give the most essential plugins which are essential for your website.

And If you are looking for SEO service for your company's website or Brand's Website, you've come to the right place. We are a skilled group of experts training in Search Engine Optimization (SEO). We are applied to getting you on top of Search Ranking results that you see for.

We provide SEO services for an extensive collection of competing industries around India. We have also served with small brands, as well as small and medium-sized companies. Our SEO Company holds in building long-term relationships with our clients based on given ideas and progress.

- Review of the competitiveness of the client's industry and the targeted keywords.
- Review of issues related to website usability, website credibility, websites accessibility, user engagement, legal issues and suggestions regarding how to fix them Engagement.
- Recommendations for avoiding/fixing negative SEO issues (keyword stuffing, duplicate contents, URL canonicalization, hidden text, hidden links, sneaky redirects, keywords cannibalization etc.)

Link building is the practice of building one-way hyperlinks (also known as "backlinks") to a website with the goal of improving search engine visibility.

We continuously monitor the effectiveness of our SEO campaign and send you traffic and rankings report on regular basis.

WEBSITE AUDIT REPORT

LINK BUILDING

SEO ANALYSIS

COMPETITIVE ANALYSIS REPORT

KEYWORDS

WEBSITE OPTIMIZATION

It provides vital information regarding competitors like who are your competitors, which keywords they are targeting, what are they doing to attract traffic and links. From where they have got their backlinks. We also determine the current ranking potential of your competitors in search engines and help in establishing KPIs.

It provides a list of keywords that can bring the highest volume of relevant traffic to the website along with their search volume. It also provides suggestions regarding how keywords should be used on-site to attract additional traffic.

We try to fix all the issues we have identified during website audit so that the website works for the client's business and it is able to convert relevant traffic into sales or leads.

Predictive algorithm, DTC alert and Maintenance.

## FUEL MANAGEMENT

Monitor and Manage the fuel efficiency of the fleet.

## SENSOR MONITOR

Monitoring and Managing your IoT Sensors.

## TRIP MANAGEMENT

Intelligent Trip and Attendance Management.

### FMS working plan:

Vehicle Management System has 8 types of user management system. Every single user access has limited and super admin can manage all user. Here are the following access panel and user role:

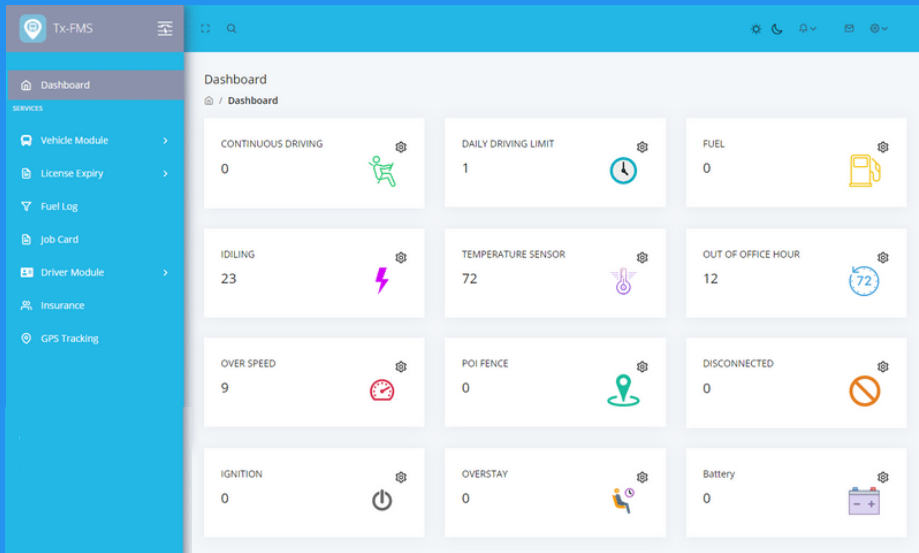

- *Admin*
- *Super Admin*
- *Management User*
- *Account Management User*
- *Inventory Management User*

# FLEET MANAGEMENT SYSTEM

Tx-Cloud FMS is an innovative big data-driven Fleet Management and IoT platform that is trusted by many customers across the globe. Our aim is to be an Improved, User-friendly & Global hardware-agnostic platform that can fit into any of the Fleet management or IoT hardware ecosystems.

- Optimize Operations with real-time vehicle tracking and work visualization.
- Maximize fleet efficiency and utilization with reporting and analytics.
- Implement proactive vehicle maintenance with direct vehicle bus integration.
- Improve safety with driver behavior monitoring.

[www.technonix.co.in](http://www.technonix.co.in)

# IoT Integration

IoT integration helps in track shipments, optimize delivery and shipping routes, and cut costs associated with inefficiencies in logistics. IoT powered GPS tracking systems that have made it possible to manage the fleet business without any human to human interaction. An IoT based device can monitor driver behavior, the engine idles, start, and stop time. The integrated GPS tracking system in transport management software offers live tracking of fleets with a visual picture of truck location with freight details. Using Tx-Cloud FMS, fleet managers can track all such data through embedded sensors and work with the drivers to improve fuel efficiency.

## USER APP

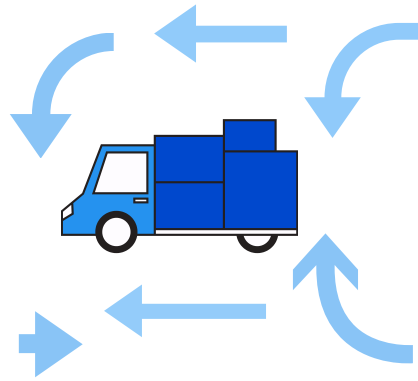

-  **GPS Tracking with Route Playback** - Track the real-time location of the vehicle, making it traceable during exigencies.
-  **Trip Video Recording** - Records time-lapse video of inside or outside view when the vehicle is in motion.
-  **High Noise Level Alert** - Alerts the owner when the driver plays loud music leading to distractions.
-  **2-Way Calling** - Call the driver through the app and talk to him even if his phone is out of battery.

## DRIVER APP

-  **In-Vehicle Alarms** - The driver gets audio alarms inside the vehicle whenever he breaches any set parameters e.g. speed limit, sound level, etc.
-  **Alerts on Mobile** - Alerts on user's phone whenever the vehicle over speeds, an unknown driver is behind the wheels, and many more, ensuring a safe commute.
